

WHAT VETS HAVE TO SAY ABOUT SPAY USA . . .

At this time there are approximately 7,000 veterinarians in the SpayUSA network. Since veterinarians considering joining the network sometimes wonder about the benefits, we asked a few of our longtime colleagues to say a few words about their experience with this organization:

**Dr. Marvin Mackie, Owner/Director
Animal Birth Control Clinics • San Pedro, California**

My experience with the SpayUSA referral network has certainly been a rewarding one. Their tireless work in promoting spay and neuter has helped generate business in my four high-volume spay/neuter clinics in the Los Angeles area. Thanks, SpayUSA, for your consistent support!

**Dr. Philip Wagenknecht, St Louis Pet Clinic
St. Louis, Missouri**

SpayUSA has been helpful to us in sending us a number of patients over the years. We believe 100% in what SpayUSA is doing because we share the same goal of ending cat/dog surplus. We have been forced to euthanize far too many healthy puppies and kittens and look forward to the day when that is no longer necessary.

**Dr. Joe Stark, Lake Area Animal Hospital
Lake Charles, Louisiana**

SpayUSA has meant a lot to me professionally and personally. Our caseload has increased tremendously over the years due to SpayUSA, even though we have never advertised that we are participants. Personally, I am gratified because we have altered hundreds of animals that never would have been neutered otherwise, and I know now that we are making a difference. Thanks for your continued support.

**Dr. Arnold Brown, Mobile Vet Clinic, Trumbull, Connecticut
First veterinarian to join program, member since 1990**

The reason I joined SpayUSA is to offer the public the option of choosing where they have their animals spayed/neutered. We are not living in a society where the prices are all the same, so people need to be able to pick and choose what fits their budget.
